Process & Decision Documentation

Project/Assignment Decisions

The goal of the project was to set up Git and link it with VS code to publish our first task, which was an inspired splash screen/message.

When going through the process of setting up my GitHub, it was confusing as we had to go through many platforms such as our visual studio, GitHub Desktop, and our repositories.

 I decided to name all my folders the same naming conventions so that they are all consistent, and made sure they were all in the same local path which I assigned to my "desktop." When I had to rename my repository, I changed the file name before pushing.

For my splash screen design, I decided to code within the sketch.js code area so that I can have more control over my text design.

GenAI Documentation
No GenAI was used in this assignment.
